

CFP: 9th International Symposium on Knowledge Visualization and Visual Thinking, KV2013

Introduction

In an increasingly complex world, Knowledge Visualization and Visual Thinking are gaining importance in all areas of science, business and society. Analogue and digital visual approaches aim to support the creation, application and communication of knowledge and insights – particularly in situations where people from different educational, cultural and professional backgrounds collaborate.

Whilst Information Visualization (IV) focuses on the use of computer-based tools to explore large data sets, Knowledge Visualization (KV) and Visual Thinking investigate (a) how to create and transfer insights between individuals and within groups, (b) how to manage and reduce complexity and to allow understanding, and (c) how to support learning, communication and interaction through new approaches and techniques.

Knowledge Visualization aims to facilitate the mutual transfer of facts, insights, experiences, values, expectations, perspectives, opinions and predictions. Researchers and practitioners in the domains of Knowledge Visualization and Visual Thinking develop strategies, tools and methods to make knowledge visible and to improve processes through which knowledge can be identified, accessed, assessed, shared, discussed, applied and generally managed.

Objective

The Symposium on Knowledge Visualization and Visual Thinking is an international, interdisciplinary forum for contributions from fields such as Knowledge Management and Visualization, Information Design and Architecture, Cognitive Science, Argument Mapping, Business Sketching, Visual Analytics, Arts, Interface Design, Business Analysis, Project Management, Economics, Market Research, Learning Sciences, Media and Communication Studies.

The joint aim is to address and discuss theories, methodologies, techniques, applications, evaluations and case studies related to the visualization of knowledge and to processes which involve visual thinking.

Scope

This call for papers seeks original papers and contributions concerning, but not limited to:

- Theories, frameworks and models of knowledge visualization and all aspects of visual thinking
- Systems, methods and ideas on the evaluation of visualization methods and on conveying un-/intended inferences (e.g. why do visualizations fail, even misrepresent, misinform, mislead etc)
- Research on the economic and social impact of visualizations (e.g. efficiency, meaning, policy, cross-cultural)
- Case studies on innovations in the visualization of knowledge, particularly in the area of 'Complexity Management' (e.g. visualizing complex change projects)
- Experiences on the use of visual metaphors in science, business, politics and society
- Evaluations in the area of marketing and management support (e.g. abstract services in business, strategy implementation etc)
- Research on the use of visual methods to communicate complex facts (e.g. nanotechnology to the general public, use of visualizations in media, in urban planning as to future cities, in general simulation etc)
- Models and applications for infrastructures using interactive touch-displays (e.g. large multi-touch displays)
- Experiences on the use of live sketching to facilitate knowledge sharing and integration

Further Information and Contact

KV2013 is part of the 17th International Conference on Information Visualisation (IV2013), 16-18 July 2013, London, UK. Details and guidelines for submission of full papers or posters (Deadline: **1 March 2013**) are available at <http://www.graphicslink.co.uk/IV2013/>

All enquiries regarding the Symposium on Knowledge Visualization and Visual Thinking should be addressed to Stefan Bertschi (knowledge@loginb.com). To maintain a high quality standard, early submission is encouraged. Since this is a collaborative and innovative forum, Stefan is open to discuss your suggestions and ideas at early stages.

Organizing Committee

Stefan Bertschi, loginb consulting, <http://www.loginb.com>, knowledge@loginb.com

Remo Burkhard, ETH Zurich, <http://www.ia.arch.ethz.ch>, burkhard@arch.ethz.ch

Martin J. Eppler, University of St. Gallen, <http://www.mcm.unisg.ch>, martin.eppler@unisg.ch

Advisory Committee

Sabrina Bresciani, University of St. Gallen, <http://www.sabrinabresciani.com>

Dominique Brodbeck, Macrofocus GmbH, <http://www.macrofocus.com>

Tom Crawford, Visualization Network, <http://www.viznetwork.com>

Serge Gebhardt, Jan Halatsch, Antje Kunze, Stefan Müller Arisona, Lukas Treyer, ETH Zurich, <http://www.ia.arch.ethz.ch>

Randy Goebel, University of Alberta, <http://www.cs.ualberta.ca>

Michael Granitzer, Wolfgang Kienreich, Vedran Sabol, Christin Seifert, Mario Zechner, Know-Center, <http://www.know-center.at>

Michael Meier, vasp datatecture GmbH, <http://www.vasp.ch>

Roland Pfister, University of St. Gallen, <http://www.mcm.unisg.ch>

Andrew Vande Moere, KU Leuven, <http://www.asro.kuleuven.be>

Wibke Weber, Stuttgart Media University (HdM), <http://www.hdm-stuttgart.de>

Wei Zeng, Chen Zhong, Future Cities Laboratory (FCL) Singapore, <http://www.futurecities.ethz.ch>
